# Nfusionsolutions ProductPricing

Installation

1. Login into the backend and go to System >> Cache Management >> Disable all cache types and disable compiler if it is enabled.

2. Upload files from "**Nfusionsolutions_ProductPricing-1.0.0**" to the root folder of your Magento Installation:

nFusion Solutions

3. Go to System >> Cache Management in Magento backend, and click the "Flush Cache Storage" button.

4. Please log out from the back end and login again for Magneto to refresh permissions.

   Now you can navigate into the below extension settings.

Extension Settings

Cron Settings

Once you have installed the extension and saved your settings in Magento admin, you need to schedule cron job through cpanel or ssh . You can choose to run cron (every minute, every 2 minutes, every five minutes, every 10 minutes) based on your requirement. Each time cron will run it will update all prices fetched from nfusion.
Below is a screenshot showing how to set cron job in cpanel.

Log into yor cPanel. Go to "cron jobs" and follow the step in screenshot below:

Add a New Cron Job

Common Settings: Once Per Five Minutes (*/5 * * * *) ⬜   Choose the frequency of cron job schedule

Minute: `*/5` Once Per Five Minutes (*/ ▼ ✅

Hour: `*` Every Hour (*) ▼ ✅

Day: `*` Every Day (*) ▼ ✅

Month: `*` Every Month (*) ▼ ✅

Weekday: `*` Every Day (*) ▼ ✅

Command: `wget http://<domain_name>/index.php/nfusions...` ✅ ← Type "wget http:// <domain_name>/index.php/nfusionsolutions/productprice /index >/dev/null 2>&1" . Replace domain_name with yours.

[Add New Cron Job]

Once you click on "Add New Cron Job", it willshow below.

Current Cron Jobs

MINUTE	HOUR	DAY	MONTH	WEEKDAY	COMMAND	ACTIONS
*	*	*	*	*	wget http://~~~~~~~~~~ /index.php/nfusionsolutions /productprice/index >/dev/null 2>&1	Edit Delete
